# WEATHER OF CONCERN

## Weather of Concern

- A Winter Storm Warning is in effect for the Sierra through today, bringing an expected 6-12 inches of snow over Sierra Nevada passes.
  - Snow levels are expected to drop to 3000-4000 feet today
  - Wind gusts 25-35 mph with local gusts up to 50 mph on the higher peaks

## **Active Weather Warnings, Watches and Advisories by County:**

- <https://alerts-v2.weather.gov/counties/CA>

# **WEATHER SYNOPSIS BY REGION**

## **NORTHERN CALIFORNIA**

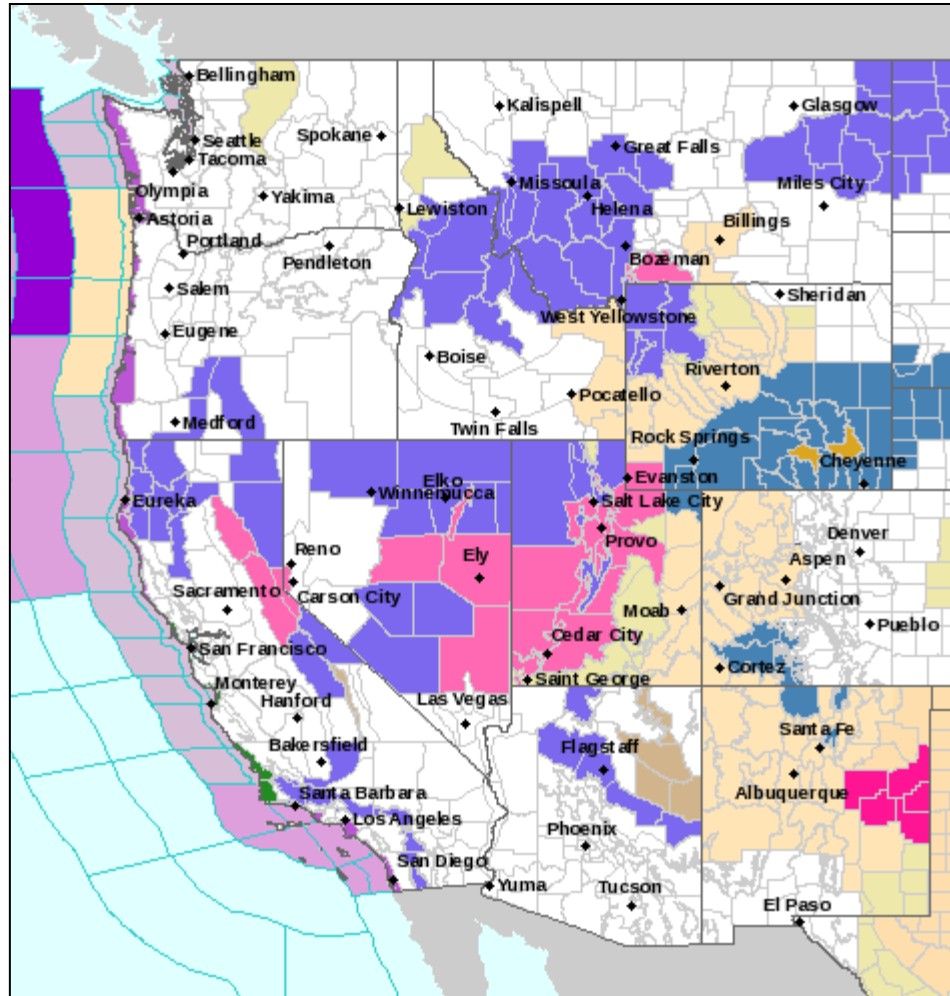

Snow accumulation levels will rapidly fall and generally range between 2500 to 3500 feet across the region by today. An additional 1 to 2 inches of liquid water will fall across the North Coast and NW mountains while 1.5 to 3.0 inches will fall across the west slopes of the Cascade and Sierra ranges. Southern portions of the Sacramento valley will see amounts around a tenth of an inch, marking the location that will benefit the least. A lighter westerly and northerly flow will develop across the area on today.

A few light residual spot showers will be found across the far northwest on Saturday with local northerly wind gusts up to 25 mph in areas. The next robust Pacific trough passage is still expected to swing over the region Sunday and Monday. Snow accumulation levels should lower to between 3000 to 4000 feet with solid wetting moisture amounts. Yet another Pacific trough is expected to impact the area the latter half of next week.

## **SOUTHERN CALIFORNIA**

A Pacific trough will bring much cooler temperatures to the region today and Saturday. By Saturday, mountain high temperatures will be in the 30s and valley high temperatures will be in the 50s. This trough will also bring scattered showers to the region with less than a quarter inch of rainfall across most locations. However, the Central Sierra will receive up to an inch of rainfall. Showers will spread south reaching the region by this afternoon. Showers will end early Saturday morning. The snow level will initially start at around 7,000 feet and then drop to between 3,000 and 4,000 feet by this evening. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas this evening through Saturday afternoon. A weak ridge of high pressure will move overhead Sunday bringing a little warmer and drier conditions. There will be north winds of 20 to 30 mph with gusts to 50 mph across much of Santa Barbara County and the Grapevine Saturday night. Zonal flow will bring near normal temperatures and humid conditions to most of the area Monday through the middle of next week. Scattered showers with light rainfall accumulations may occur from a Monterey/Fresno County line northward Monday through the middle of next week.
